Summary

Full Stack Developer skilled in building scalable web applications using React, Next.js, JavaScript, TypeScript, Java, JSP, Servlets, MySQL, and PostgreSQL. Experienced in developing end-to-end solutions including frontend interfaces, backend APIs, database design, authentication systems, and AI-powered applications with real-time features.

Skills

Languages: C, C++, Java, Python, TypeScript

Frontend: HTML5, CSS3, JavaScript, Bootstrap, Tailwind CSS

Frameworks: React.js, Next.js

Backend: PHP, JSP, Servlets, JDBC, Node.js, REST APIs

Database: MySQL, PostgreSQL (Neon DB)

AI/ML: Gemini AI API, Face API, Web Speech API

Tools: Drizzle ORM, Git, GitHub, VS Code, IntelliJ, Eclipse

Core: OOP, Data Structures, DBMS, SDLC, MVC

Experience

Hybrid Application Development Intern

Jun 2025 – Aug 2025

SDAC Infotech

- Built a full-stack Import-Export ERP application using Java, JSP, Servlets, JDBC, MySQL, Bootstrap, and MVC2 architecture
- Developed modules for seller registration, login, product management, order management, reported products, and profile management
- Designed and optimized MySQL databases with relational schemas, foreign keys, and secure authentication mechanisms
- Collaborated on SRS documentation, testing, debugging, deployment, and implementation of AI/ML-based ERP enhancement features

Projects

AI Interview Mocker — Next.js, TypeScript, PostgreSQL, Clerk, Gemini AI

- Developed AI-powered mock interview platform with real-time voice-based interaction and dynamic question generation
- Integrated Gemini AI for evaluating answers with scoring, feedback, and improvement suggestions
- Implemented facial confidence detection using Face API and speech recognition using Web Speech API
- Designed coin-based system with authentication and dashboard analytics using PostgreSQL (Neon DB)

Smart Loan Approval System — PHP, JavaScript, MySQL

- Built ML-based system to predict loan approval based on user financial data
- Developed responsive UI and integrated backend logic with MySQL database
- Designed dashboard for visualization of loan decisions and analytics reports

Import-Export ERP System — JSP, Servlets, JDBC, MySQL, Bootstrap

- Developed a web-based Import-Export ERP system using MVC2 architecture for seller registration, authentication, product management, and order tracking
- Implemented CRUD operations for products, order status management, reported product handling, and profile management using JSP, Servlets, JDBC, and MySQL
- Designed and optimized relational database schemas with foreign key relationships for users, products, orders, reports, and analytics data

Certifications

Infosys Springboard – Programming (Java, C, C++, Python, HTML)

[View Certificate](#)

Education

B.E. Information Technology

2023 – Present

Pravin Rohidas Patil College, Bhayander

CGPA: 8.0 / 9.05 / 9.04 / 10.0

Soft Skills

Communication Teamwork Adaptability Time Management
